

Art.-Nr.: 800000

Re-Zinc system can be used for two purposes: To treat car body panels during rust repair process. The rust should be grinded off as good as possible. After treat the surface with the RE-Zinc system and it will remove the rust particles out of the pores. At same time it will put zinc layer over the to be repaired area and stop the corrosion process. To zinc coat repaired panels and welds Re- Zinc can be used everywhere, where before primer, Zinc spray or Zinc powder colour has been used. The Zinc coat the user gets with Re-Zinc system is a very durable and matt coating of pure Zinc which does not need any drying time. On this zinc-coat putty, filler or paint can be easily applied. Only blank sheet metal will be over coated, there is no influence to the paint. The Re-Zinc Electrolyte is not an acid.

Maße und Gewicht

L x B x H: 24,5 x 15,3 x 7 mm

Gewicht: 5,95 kg

BENEFITS

- Plank places on car bodies can be fast and easy post galvanizing.

SCOPE OF DELIVERY

- 1 x Re-Zinc 80 handle
- 1 x Re-Zinc 30 small handle
- 1000 ml Electrolyt
- Plastic container
- Several spare parts
