MI

**SUCTION BENCH WITH ADJUSTABLE
SUCTION BY USING AN INVERTER FOR SPECIAL WORKS,
MANUAL WORKS OR USING TOOLS WITHOUT SUCTION.
VERTICAL CARTRIDGE FILTER TO COLLECT DUST IN THE
REMOVABLE POCKETS WITH MANUAL OPENING.
MANUAL START**

Suction bench for the machining of large parts, the MI model is suitable for manual sanding and for processing with abrasive tools without its own suction. Silent motor, 75 dB, with non-slip and scratch-proof rubberised support surface.

Its dimensions make it the largest among our standard range. The assembly on sturdy wheels allows to move the bench with maximum ease and transport it where it is best believed necessary.

The MI version is equipped with F9 filter class filters, perfect for sanding dust, but it is possible to mount different types, class H for dust harmful to health, ATEX certified for potentially explosive dust and / or even use prefilters for different needs such as the hood for paints and sprays or anti-spark metal mesh for grinding and deburring with abrasives.

Can be equipped with containment bulkhead, also suction, so as to increase the prevalence of suction and contain splashes or slags derived from processes
