

THE DENT VIEWER

PHOTO AID FOR VEHICLE DAMAGE

(FRONT AND BACK VIEW)

It can be difficult to accurately capture panel damage, especially when the damage is minor. The Dent Viewer™ is a photo aid that will assist body shops in documenting even the slightest damage to a panel. Many times photos will not justify the actual time it takes to complete a repair. The Dent Viewer™ captures 100% of the damage 100% of the time. Even the slightest dents and rolls are easily visible in photos when body shops use this tool. The board is constructed of weatherproof PVC. The grid is printed on a reflective backing that grabs the camera flash and illuminates the grid onto the damaged panel.

The Dent Viewer board is double sided and measures 25cm x 33cm.
